All interested persons are hereby given notice that the City of Norman, in conjunction with the Oklahoma Department of Transportation (ODOT), is proposing to reconstruct a portion of West Lindsey Street from 24th Avenue SW to Berry Road in Norman, Oklahoma. Please see attached map.

A public informational meeting and open house to present initial project information and receive public input will be held on Monday, March 3, 2014 from 6:00 pm to 8:00 pm in the Main Conference Room located at Sooner Legends Inn and Suites at 1200 24th Avenue SW. The meeting will include a presentation about the proposed improvements to West Lindsey Street including why the improvements are needed, the type of improvements proposed and the expected impacts to motorists and the surrounding community. The primary purpose of the meeting is to obtain information from the general public and project stakeholders to further assist in the Environmental Assessment process including the identification of critical social, economic and environmental effects that may result from the project.

West Lindsey Street is currently a 3-lane roadway through the project area. The project consists of widening West Lindsey Street from 24th Avenue SW to Berry Road from three lanes to a divided 4-lane roadway, replacing the Imhoff Creek Bridge and addressing the storm water flooding that has affected this area for many years. This project also includes upgrading the traffic signals along West Lindsey Street at the intersections of 24th Avenue SW, McGee Drive and Berry Road. The upgrades to West Lindsey Street will provide a safer and more efficient transportation corridor for the traveling public.

The City of Norman strives to accommodate the needs of all residents, including those who may be disabled. If you would like to attend this meeting but find it difficult because of a disability, architectural barrier, or another special need, please contact Mr. John Clink at (405) 366-5424, by email at John.Clink@NormanOk.gov or by writing to the City of Norman, Engineering Division, PO Box 370, Norman, Oklahoma 73070.
